FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

Ex Parte Submission in Docket 92-77

Dear Ms. Searcy:

To correct various erroneous claims by some parties in this proceeding regarding AT&T's "remonopolization" of the calling card business, AT&T had previously submitted certain data to the Common Carrier Bureau under request for confidential treatment. So that these data may be considered by the Commission in its resolution of the "Public Domain" part of this proceeding, AT&T hereby withdraws its request for confidential treatment of the following information, and requests instead that this information be placed in the public record.

Specifically, the data introduced are as follows:

1. Attachments 1 and 2 show AT&T's estimate of its percentage of calling card traffic relative to the industry as a whole, and a breakdown of how that traffic is billed, either by Local Exchange Carrier (LEC) card or AT&T's proprietary card.
2. Attachment 3 is an estimate of the percentage of "public" station lines that are presubscribed to AT&T. The total number of lines include not only the traditional, publicly available sets provided by the LECs and the Private Payphone Companies (PPCs), but also room phones in hotels, hospitals, and universities, phones in prisons, and on military bases. Of the total stations presubscribed to AT&T, less than 40% are done so via contract, i.e., involving the payment of commissions.

If you have any questions pertaining to this information, please contact me.
